

Cupsy - Food Ordering Mobile App Design

UI/UX Design | Figma

Project Overview

- Designed the complete Cupsy food-ordering app from scratch, including the app concept, original name, logo, interface, and user flows.
- Created a simple, modern, and user-friendly interface with a consistent visual design throughout the app.
- Designed 3–4 animated opening screens based on the Cupsy logo to create an engaging app-opening experience.

App Structure

- Home → Explore → Orders → Wishlist → Account
- Designed a fully interactive prototype, where buttons, food items, categories, and navigation elements are connected to their respective screens.
- Focused on creating a clear and seamless user journey from browsing food to placing and tracking an order.

Explore & Food Categories

- Explore → Food Categories → Sub-categories → Food Item
- Added 6 main food categories: Burgers, Pizza, Snacks, Beverages, Indian Food, and Desserts.
- Added relevant food divisions such as: Veg → Non-Veg → Combo.
- Designed individual food-item interactions, allowing users to select specific products such as: Non-Veg → Classic Chicken Burger → Item Details.

Food Ordering Flow

- Food Item → Add-ons → Add to Cart → Checkout → Payment → Place Order
- Designed an item customization section with optional add-ons such as: Jalapeño → Chilli Flakes → Hot Sauce.
- Users can select additional items and proceed directly to the cart.
- Checkout screen displays the selected items and order details before payment.
- Added multiple payment options such as: UPI / Wallet / Cash on Delivery → Place Order.

Order Tracking

- Place Order → Order Confirmed → Track Order → Map + Estimated Delivery Time
- Designed an Order Placed confirmation screen.
- Added a Track Order option for monitoring the order status.
- Track Order screen includes: Delivery Map → Order Status → Estimated Delivery Time.

Order Section

- Orders → All / Out for Delivery / Delivered / Cancelled
- Designed separate order-status sections for better order management.
- All: Displays the complete order history, including currently active orders.
- Out for Delivery: Shows orders that are currently being delivered.
- Delivered: Displays successfully completed orders.
- Cancelled: Displays cancelled orders.
- Added a direct interaction: Out for Delivery → Track Order → Delivery Map.

Key Design Focus

- Designed completely from scratch.
- Original Cupsy name and logo.
- Fully interactive prototype.
- Clear navigation and user flow.
- Simple and user-friendly interface.
- Consistent UI across all screens.
- Complete journey: Browse → Customize → Cart → Checkout → Payment → Order → Track.

Showcases the complete UI/UX screens designed for the Cupsy food-ordering app, including starting with 4-5 initial animation screens.

Shows how the designed screens are connected through clickable interactions and how users navigate across the complete app flow.

Project Architecture & Scope

Massive Scale (58+ Custom Screens):

Completely conceptualized and designed from scratch, featuring a comprehensive ecosystem of 58 unique screens tailored for a seamless end-to-end user journey.

Intricate Interactivity & Flow:

Every single page, button, and element is thoughtfully linked through advanced prototyping. Buttons, recommendations, and navigational flows dynamically respond to user choices, ensuring a fully immersive and realistic app experience.

Zero Templates, Pure Originality:

Built entirely from the ground up without any copy-pasted assets or shortcuts, showcasing meticulous attention to UI/UX hierarchy, micro-interactions, and visual storytelling.
